

M.Sc. Fashion & Apparel Design (CBCS) Syllabus
(I to IV Semesters)

2014-15 onwards

DEPT. OF APPAREL TECHNOLOGY & MANAGEMENT
CENTRAL COLLEGE CAMPUS,
BANGALORE 560001

M.Sc. FASHION & APPAREL DESIGN (CBCS)

Semester I								
CODE	Subjects	Paper Theory/ Practical	Instruction Hrs/week	Duration of Exam (Hrs)	Marks			CREDIT
					IA	Exam	Total	
FAD 1.1	Textile Process and Products	Theory	4	3	30	70	100	4
FAD 1.2	Apparel Design	Theory	4	3	30	70	100	4
FAD 1.3	Apparel Technology I	Theory	4	3	30	70	100	4
FAD 1.4	Research Methodology	Theory	4	3	30	70	100	4
FAD 1.5	Textile Process and Products	Practical	4	4	15	35	50	2
FAD 1.6	Design Methodology	Practical	4	4	15	35	50	2
FAD 1.7	Garment Construction I	Practical	4	4	15	35	50	2
FAD 1.8	Computer Aided Design	Practical	4	4	15	35	50	2
FAD 1.9A	Knitwear Design Technology or World Textiles & costumes	Theory	3	3	30	70	100	2
FAD 1.9B								

Semester II								
CODE	Subjects	Paper Theory/ Practical	Instruction Hrs/week	Duration of Exam (Hrs)	Marks			CREDIT
					IA	Exam	Total	
FAD 2.1	Chemical Processing & Finishing	Theory	4	3	30	70	100	4
FAD 2.2	Apparel Technology II	Theory	4	3	30	70	100	4
FAD 2.3	Apparel Costing	Theory	4	3	30	70	100	4
FAD 2.4	Fashion Merchandising & Marketing	Theory	4	3	30	70	100	4
FAD 2.5	Chemical Processing & Finishing	Practical	4	4	15	35	50	2
FAD 2.6	Garment Construction II	Practical	4	4	15	35	50	2
FAD 2.7	Project Work	-	8	Report Evaluation	30 Viva voce	70	100	4
FAD 2.8A	Textiles for Interiors or Eco-textiles and sustainable clothing	Theory	3	3	30	70	100	2
FAD 2.8B								

Semester III								
CODE	Subjects	Paper Theory/ Practical	Instruction Hrs/week	Duration of Exam (Hrs)	Marks			CREDIT
					IA	Exam	Total	
FAD 3.1	Apparel Quality Control and Standards	Theory	4	3	30	70	100	4
FAD 3.2	Fashion Accessory Design	Theory	4	3	30	70	100	4
FAD 3.3	Retail Management	Theory	4	3	30	70	100	4
FAD 3.4	Fashion Draping	Practical	4	4	15	35	50	2
FAD 3.5	Advanced Textile &Apparel Testing	Practical	4	4	15	35	50	2
FAD 3.6	Apparel Value Addition	Practical	4	4	15	35	50	2
FAD 3.7	Fashion Accessory Design & Production	Practical	4	4	15	35	50	2
FAD 3.8 OE	Fashion Design	Theory	4	3	30	70	100	4

Semester IV								
CODE	Subjects	Paper Theory/ Practical	Instruction Hrs/week	Duration of Exam (Hrs)	Marks			CREDIT
					IA	Exam	Total	
FAD 4.1	Functional Textiles & Clothing	Theory	4	3	30	70	100	4
FAD 4.2	Fashion journalism and photography	Theory	4	3	30	70	100	4
FAD 4.3	Management Information Systems	Theory	4	3	30	70	100	4
FAD 4.4	Export Trade & Documentation	Theory	4	4	30	70	100	4
FAD 4.5	Fashion Studio	Practical	4	4	15	35	50	2
FAD 4.6	Portfolio Presentation	Practical	4	4	15	35	50	2
FAD 4.7	Project Work	-	8	Report Evaluation	30 Viva voce	70	100	4

SEMESTER I
TEXTILE PROCESS AND PRODUCTS

FAD1.1

No. of Teaching Hours: 52

Objectives:

- To acquaint students with the requisite knowledge of process to suit the product and fields of application.

Unit 1

6 Hrs

Yarn manufacturing process: Ginning – Faults in ginning and controls for optimum ginning. Influence of fibre property on various techniques of spun yarn process. Suitability of spun yarns produced with different techniques for specific products in various fields. Post spinning process of spun yarns for efficient performance in further stages of manufacture and uses.

Unit 2

6Hrs

Features of various methods of filament yarn production, controls and post spinning requirements. Study of special methods of producing filaments.

Unit 3

8 Hrs

Controls in shuttle and shuttleless weaving machines. Yarn quality requirements for weaving domestic and export products.

Unit 4

2 Hrs

Study of dobby and jacquard woven products. Fabric defects - types, causes and remedies.

Unit 5

8 Hrs

Introduction to jacquard knitting machine. Wrap patterning and gaiting of needles. Fabric defects - types, causes and remedies. Knitted fabric structure: Tightness factor, dimensional properties, spirality-relaxation- shrinkage. Dimensional characteristics of warp knits warp knitted fabric geometry - relation between loop length and construction, fabric relaxation and shrinkage.

Unit 6

10 Hrs

Non wovens: Definition, Classification, Raw materials, Web formation techniques - dry laid, wet laid. Bonding techniques – mechanical, thermal and chemical. Properties of nonwoven fabrics, products, applications and its characteristics. Braids- construction methods, properties, characteristics and application. 3 D woven fabrics and their application.

Unit 7

8Hrs

Thermal Properties and Comfort: Thermal comfort, concept of heat and mass transfer, thermal protection, moisture vapour transmission, permeability, factors affecting moisture vapour permeability, relationship between moisture vapour permeability and comfort, liquid –

moisture transmission, water repellency and water absorption., factors affecting liquid – moisture transmission, correlation between air permeability and other factors.

Unit 8

4 Hrs

Fabric mechanical properties and tactile pressure sensations: Fabric prickliness, itchiness, stiffness, softness, smoothness, roughness, and scratchiness, garment fit and pressure, comfort – general aspects, construction factors, dimensional changes and the effects of fit on comfort.

4. Li Y, “The Science of Clothing Comfort”, Textile Progress, Vol.31, No.1/2, The Textile Institute, 2001.
5. Lord P R, “Hand book of yarn production: Technology, Science and Economics”, Woodhead Publishing, 2003.
6. Sabit Adanur, “Handbook of Weaving”, Technomic Publishing Co., Inc., India, 2001.

APPAREL DESIGN

FAD1.2

No. of Teaching Hours: 52

Objectives:

- To impart advanced technical skills in pattern making
- To acquaint students with knowledge in designing for special categories.

Unit 1

6 Hrs

Introduction to pattern making and clothing construction- terminology, tools and equipments, principles and applications of pattern making techniques-drafting, flat pattern- dart manipulation and draping techniques, Pattern alteration, types of grading.

Unit 2

4 Hrs

Design Concepts: Elements and principles of design, application of design concepts in fabrics and fashion products.

Unit 3

3 Hrs

Measurements for pattern design- individual and standard measurements, measuring techniques- individual, dress forms, human figure, measurements for fit and pattern size.

Unit 4

8 Hrs

Body garment relationship- Ideal figure, figure types, figure analysis, garment design, fabric characteristics & design, structural frame work, contours, proportions, height and weight distribution.

Unit 5

4 Hrs

Fitting strategies, fit components, fit evaluation, 3 fitting checks and custom made clothing, commercial patterns.

Unit 6

10 Hrs

Designing for special categories: Features and functions of formal, casual and ethnic clothing for various categories and occasions, designing for Infants, maternity wear, plus sizes, elderly citizens, uniforms and physically and mentally challenged.

Unit 7

5 Hrs

Intimate apparel, lingerie and other special categories: Evolution of styles from antiquity to modern, design and current trends in intimate apparel, lingerie and body suit categories.

Unit 8

4 Hrs

Stitching strategies- stitch classification, securing, temporary, permanent, decorative, principles of hand and machine stitches, stitch and thread selection.

Unit 9

4 Hrs

The mechanics of fashion: Role of fashion designers in fashion industry. The fashion design process adapted by designers. Leading fashion designers of India and the world.

Unit 10**4 Hrs**

Prevailing fashion trends and forecast for fibres, yarns, colours, trends and forecast for various fashion categories for children, men and women.

4. Gavin Waddell,” How Fashion works”, Blackwell Publishing, 2005.
5. Laver, James, “Costumes & Fashions: A concise history”. London: Thames & Hudson, 1982.
6. Sharon Lee Tate, “Inside Fashion Design”, Harper & Row Pub, NY.

APPAREL TECHNOLOGY I

FAD1.3

No. of Teaching Hours: 52

Objectives:

- To provide an insight into technological aspects of apparel manufacturing.
- To familiarize students with various tools & equipments used in apparel production.

Unit 1

8Hrs

Introduction to Indian Apparel Industry: Organizational structure and sectors of the garment industry, apparel product types, developments in recent years, opportunities and challenges in Indian apparel sector, over view of global apparel industry, major trends in international apparel technological concepts.

Unit 2

8Hrs

Pre production process: Tech pack analysis, sampling, pattern and marker preparation, fabric and accessory procurement, sample types, approvals.

Garment production: Sequence of production operations for shirts, trousers, jackets, skirts and vests.

Unit 3

10Hrs

Overview of industrial sewing machines: Features, mechanism, working principle and application of SNLS machine, DNLS machine, over lock machine, blind stitch machine, button sewer and buttonhole machines, bar tack machines.

Study of compatibility of stitch classes and needle types used in industrial sewing machines, seam types and its application.

Selection & application of bed types, machine attachments types, profiles, feed mechanism for different types of fabrics & garment style variation.

Unit 4

6Hrs

Fabric spreading technology: Forms of spreading for different types of fabrics, lay types, spreading modes, spreading methods & machines- manual and mechanical methods.

Advanced spreading machines: Semi automatic and automatic-programmable spreading machine

Unit 5

6Hrs

Cutting technology: Cutting techniques, considerations of cutting parameters for different fabrics Cutting machines and its working principle, recent advancements in cutting technology- semi automated and automated cutting machines, working environment and safety measures.

Unit 6

4 Hrs

Fusing technology: Fusing materials, components of fusing, types of resin coating & its applications for various apparel products, selection of fusing machines types, working principle and their application.

Unit 7

4Hrs

Pressing and folding process: Steam boilers, pressing tables, machinery and equipments, types of folds, folding equipment and accessories.

Unit 8**6 Hrs**

Packing: Function and scope of packing, packing methods, instructions, materials, weight, ratio, and labelling considerations for shipment by air and sea, packing marks, warehousing - assortment and storage methods.

RESEARCH METHODOLOGY

FAD1.4

No. of Teaching Hours: 52

Objectives:

- To familiarize students with the various types of research, data collection & analysis of research.

Unit 1

6 hrs

Meaning and significance of research in management, different approaches to research- scientific method and non scientific methods, types of research.

Unit 2

6 hrs

Formulation of research problem, defining research problem, generating research hypothesis, research process, research design, classification of research designs, need for research design, features of good research design, research proposal.

Unit 3

6 hrs

Sampling techniques: Steps in sampling, types of sample design – probability and non probability sampling designs, size of sample, sampling errors, concept of measurements and scaling, scaling techniques, characteristics of sound management.

Unit 4

8 hrs

Sources of data: Primary v/s secondary data, sources of primary data – observation, interview method, survey method, questionnaire construction and design.

Unit 5

4 hrs

Processing of research data: Editing, coding, classification and tabulation.

Unit 6

8 hrs

Analysis of the data, comprehension of the analysis, findings and suggestions of the research.

Unit 7

6 hrs

Measures of central tendency, measures of variation, measures of dispersion and skewness, test of randomness, Hypothesis testing: Null and alternative hypothesis, level of significance, one and two sample tests, Statistical packages.

Unit 8

8 hrs

Report writing: Types of reports, objectives and function of report- formal and informal, report writing process, target audience, pre-research proposals, progress reports, final reports, guidelines for effective writing, research report format, presentation of a report, persuasive nature for effective writing, reports for decision making, technical proposal.

TEXTILE PROCESS AND PRODUCTS

FAD1.5

16 Practicals of 4 Hrs each

Objectives:

- To impart the knowledge of textile process and their products.
- To familiarize the students with product assessment methods.

Unit 1 Yarn test for its quality- Yarn unevenness, Hairiness, Strength.	2
Unit 2 Collection of yarn samples with associated products.	2
Unit 3 Determination of geometric properties of woven and knitted fabrics (10 types). Wovens: Yarn linear density, GSM, thread density, crimp, cover factor. Knitted fabrics: Course per inch, wale per inch, thickness, GSM, loop length, count of yarn and tightness of the fabric.	4
Unit 4 Structural analysis of woven and knitted fabrics (10 types).	4
Unit 5 Assessment of functional properties of fabrics- water vapour permeability, air permeability, wicking, crease recovery.	4

DESIGN METHODOLOGY

FAD 1.6

16 Practicals of 4 Hrs each

Objectives:

- To develop aesthetic and creative sensibilities and communication.
- To provide a good understanding and application of mixed media, materials, techniques and methods for creative expression.

Unit 1

4

Process of motif development: Geometrical, stylized and abstract, enlargement and reduction, various types of repeats and placements for various applications.

Unit 2

6

Introduction to traditional and contemporary designs: Design profile of traditional and contemporary design, creating new textures and sketching of traditional and contemporary design using different mediums.

Unit 3

4

Thematic process of motif development: Sources for basic sketching and painting. Inspiration from traditional and contemporary designs: Nature, religion mythology, art, crafts, architecture, historical textiles, paintings from various countries and cultures.

Unit 4

2

Product development portfolio with the designs created for apparel and interiors.

GARMENT CONSTRUCTION I
16 Practicals of 4 Hrs each

FAD 1.7

Objectives:

- To impart knowledge of drafting and construction of clothing.
- To enable students to understand adaptation techniques of various style features to basic garments.

Unit 1 Development of basic blocks: men's bodice, women's bodice.	2
Unit 2 Dart manipulation techniques on women's wear.	2
Unit 3 Style features-Yoke, pocket design and its variations for women's clothing.	2
Unit 4 Designing and stitching of jackets with style variations (2 garments).	5
Unit 5 Designing and stitching of women's clothing using dart manipulation techniques and yoke design (2 garments)	5

COMPUTER AIDED DESIGN

FAD 1.8

16 Practicals of 4 Hrs each

Objectives:

- To acquaint students with the application of computers in pattern making.
- To enable the students to develop patterns and grade them to industrial standards.

Unit 1

1

Introduction to AccuMark explorer: Pattern design system (PDS) - creating storage area, setting up and editing p-user environment table, notch table and rule table.

Unit 2

2

Working tools: Creating and editing points, notches, lines and pieces.

Unit 3

1

Digitizing procedure: Pattern preparation, digitizing and verification of patterns.

Unit 4

4

Drafting basic blocks, annotation of patterns, modification of patterns as per style requirement of the garment, adding fullness – pleats, gathers, darts, dart manipulation, seam allowances, shaping corners, rotating patterns with accordance to grain line.

Unit 5

4

Grading: Selecting grading methods, editing rule table, size range, assigning rule table, grading patterns with x and y co-ordinates.

Unit 6

3

Marker making: Marker making procedure, setting up model editor, annotation editor, block buffer editor, lay limit editor and order editor.

Unit 7

1

Plotting: Procedure - setting up annotation editor, piece plot parameter and table piece plot order.

KNITWEAR DESIGN AND TECHNOLOGY

FAD1.9A

No. of Teaching Hours: 39

Objectives:

- To impart knowledge on designing for knitted apparels.
- To acquaint students on various knitwear categories and knitwear apparel production

Unit 1

3 Hrs

Introduction to knitted fabrics. Difference between knits and wovens, Indian knitting industry – past, present and future.

Unit 2

4 Hrs

History of knitting, Hand knitting, terms used in knitting, weft knitting & warp knitting – introduction and comparison. Parts and functions of weft knitting and warp knitting – calculations used in knitting.

Unit 3

4 Hrs

Yarns used for knitting-cotton, wool, nylon, acrylic, high bulk acrylic, spandex, etc. Properties of knits for apparel production – stretch and shrinkage factors.

Unit 4

4 Hrs

Wefts knit structures – single jersey or plain – rib – purl – interlock – Knit float-tuck and stitch structures – designing of weft structures. Warp Knit Fabrics –warp knit structures – underlap – overlap – closed lap and open lap stitches.

Unit 5

2 Hrs

Latest Knitting machines, weft –knitting machines- warp knitting machines – Knitted fabric defects.

Unit 6

6 Hrs

Knitwear production-Machineries: Flat bed, circular & stock knitting machines, categories of knitted garments –fully cut, stitch shaped cut, fully fashioned and integral garments, seams, seam finishes & stitches, machinery used,pre-production and production, finishing and precautions in apparel production.

Unit 7

4 Hrs

Knitted garment manufacture: Cutting – stitching – quality control of knitted garments- knit wear garment designs and developments.

Unit 8

4 Hrs

Introduction to knitted apparels- apparel categories-men, women and children casual, formal/sportswear, sweaters and hosiery.

Unit 9

3 Hrs

Quality control of knitted garments-Fabric quality-weight per unit area, tightness factor, knitted faults, pilling. Garment quality-spreading, cutting, sewing and final inspection.

Unit 10**5 Hrs**

Introduction to knitwear designing-Factors influencing knitwear designing, fashion as applied to knitwear-past present and future. Innovations in knitwear-Recent trends in knit wear-seamless garment construction, surface embellishments on knitwear, knits in interiors and computer aided designing in knitwear.

References:

1. David Spencer, "Knitting Technology", Pergamon Press, Oxford, 2001.
2. George A Tay, "Fundamentals of weft knitted fabrics", National Knitwear and Sportswear Association, New York, USA, 1996.
3. Jay Diamond, Ellen Diamond, "The World of Fashion", 3rd Edition, Fairchild Publication, 2002.
4. Sandy Black, "Knitwear in Fashion", Thames and Hudson Publication, 2002.
5. Terry Brackenbury, "Knitting Clothing Technology", Blackwell Publishing, 2005.

WORLD TEXTILES & COSTUMES

FAD 1.9B

No. of Teaching Hours: 39

Objectives:

- To acquaint students with textiles and costume designs of different regions during different periods.

Unit 1

2Hrs

Introduction to textiles and costumes of world: History of fashion, psychology of clothing, factors influencing costumes.

Unit 2

5Hrs

Historic costumes: Costumes, head dress, hair style and accessory of head dress and accessories of ancient world- The ancient middle east -3500-600BC- Mesopotamian, Egyptian, Roman, Byzantine, Greece, old English and French, Victorian Period, French Revolution, Renaissance costumes, Boroque and Rococo.

Unit 3

4Hrs

Textiles and costumes of eighteenth and nineteenth century – The American colonies, French, England, Italy and Austria, Directoire period (1790-1820), Romantic period (1820-1850), Crinoline period(1850-1869),The Butle period(1870-1900).

Unit 4

6Hrs

Introduction to the traditional textiles and costumes of ancient India - Indus valley civilization, Mauryan and Sunga, Satvahana period, Kushan Period, Gupta and Mughal period.
Contemporary Indian costumes of different states of India: East, West, North and South states

Unit 5

6Hrs

The ancient world textiles: The Mediterranean, central and north Europe, The Middle Eastern textiles- Sassanian, early Islamic, Byzantine silks, Safavid Iran(1499-1722), The Ottoman empire, Central Asian textiles- Republics of Turkmenistan, Uzbekistan, Tadjhikistan, Kirghzia and Kazakistan, Iran and Afghanistan,Portugues carpets.

Unit 6

4 Hrs

Textiles and costumes of Asia: Historic background and trade, Textiles from Pakistan, China, Japan, Thailand, Myanmar, Laos and Cambodia, Philippines, Indonesia, Malaysia.

Unit 7

6 Hrs

Textile and costumes of Western Europe: Silian Silks, Italian Silks, Spanish silks, French silks, figured linen damasks from Netherland, French tapestries, Italian embroidery and lace and printed textiles. Textile and costumes of Eastern Europe: Embroidered textiles from Hungary, Greece.

Unit 8:

3Hrs

Textile and costumes of Colonial North America (1700-1990), Native North America, LatinAmerica.

Unit 9**3Hrs**

Textile and costumes of Africa: Traditional designs, Gold embroidery of North Africa, Ghana, Kuba and Madagascar.

References

1. Chas A, "Historic Costume", Bernard and Co, 1961.

SEMESTER II

CHEMICAL PROCESSING & FINISHING

FAD 2.1

No. of Teaching Hrs. 52

Objectives

- To acquaint students with modern concepts in dyeing, finishing & bio processing.
- To enable students to understand energy conservation & pollution control approaches in textile processing.

Unit 1

4 Hrs

Preparatory processes: Desizing, Scouring, Bleaching, Mercerization.

Unit 2

10Hrs

Dyeing: Introduction, classification, Theory of Dyeing, Application of dyes- direct, basic, acid, vat, reactive, sulphur and disperse dyes. Eco-friendly dyeing, Natural dyes – importance and applications.

Unit 3

6Hrs

Developments in the application of direct, reactive, disperse dyes to textile materials using batch wise and continuous methods, Waterless dyeing.

Unit 4

4 Hrs

Printing with different dye classes: Direct, resist and discharge styles of printing - Transfer printing of polyester and blends, Digital printing.

Unit 5

8Hrs

Chemical finishing: Application of water repellent/proof, flame retardant, mildew proof, moth proof, anti-static, soil release, UV protection, anti microbial, odour control and fragrance finishes, resin finishing: durable press, wrinkle free, silicone finishing.

Unit 6

6 Hrs

Garment Processing & finishing: Processing of grey fabric garments, garment dyeing, machinery for garment dyeing, garment finishing and printing.

Unit 7

4Hrs

Denim finishing: Process conditions, machineries, chemicals and enzymes used for various special effects, stone wash, enzyme wash, biopolishing & biostoning, sand blasting, ozone and laser fading.

Specialty garment finishes: Leather finish, rubbery touch, feather touch, peach skin finish.

Unit 8

4 Hrs

Application of enzymes in processing: Mechanism of enzyme reactions – Bio scouring and Bio-bleaching and the other combined processes. Enzyme washing.

Unit 9

6Hrs

Energy conservation steps in chemical processing: Low wet pick-up techniques - causes and remedies for water and air pollution. Wastewater characteristics; wastewater treatment - objectives, methods and implementation considerations, recycling of effluents, low cost adsorbents and modern effluent treatment processes.

APPAREL TECHNOLOGY II

FAD 2.2

No. of Teaching Hours: 52

Objectives:

- To endow students with the advanced apparel production process and systems.
- To make the students aware of developments in apparel industrial engineering concepts.

Unit 1

3Hrs

Introduction to core concepts of apparel production: Evolution of apparel production processes; mass production concepts and standardization of sizing, various production systems practiced in India and their application for different apparel products, emerging trends in apparel production processes.

Unit 2

4Hrs

Introduction to apparel industrial engineering concepts: Evolution of industrial engineering, scope of industrial engineering in global perspective, IE interface with apparel production.

Unit 3

3 Hrs

Operator training and development: Classification of sewing operators, need based training- primary and secondary training, training modules, multi skilled operator development, adaptation of performance improvement methods, reasons of training failure, retraining on low performance key areas, improving effectiveness of training.

Unit 4

3Hrs

Elements of production planning and control: Task scheduling, material resource planning, process selection and planning, basic capacity calculation, estimating quantity & costs of production.

Unit 5

6Hrs

Production plant layout and material handling: Principles of plant layout, plant layout considerations; integration of workmen, material and machines, minimum movement, safety measures, maximum visibility, material handling techniques- application of advanced material handling equipments to eliminate non productive movements, minimum handling of materials.

Unit 6

8 Hrs

Work study: Method study approach, work measurement; tools and techniques, principles of motion economy, ergonomics, SAM calculation methods, work elements, basic motion elements, predetermined motion time standards, micro and macro motion charts; operation process chart, flow process chart, string diagram, efficiency indices.

Unit 7

4Hrs

Line planning: Line requirement parameter considerations based on type of apparel product, SAM, order quantity, lead time, factory efficiency.
Men and machine requirements planning, batch setting, line balancing concepts, elimination of bottlenecks.

Unit 8**6 Hrs**

Productivity management: Overview of productivity measures, measuring labour productivity, machine productivity & value productivity, strategies to improve productivity, factors affecting productivity, balancing productivity and quality.

Unit 9**4 Hrs**

Performance appraisal (PA): Analysis and development, criteria for PA, techniques of PA, employee turnover, absenteeism, attrition and retention, industrial hygiene and safety standards

Unit 10**8 Hrs**

Emerging trends in apparel production concepts: Lean manufacturing concepts, lean principles, six sigma, theory of constraints (TOC), lean tools; muda, just in time, 5s, total productive maintenance(TPM), kanban, kaizen, KPI, poka yoke, PCDA, SMED, value stream mapping, tact time calculation, root cause analysis.

Unit 11**3 Hrs**

Innovative trends and challenges in apparel production: IT applications in capturing motion economy and time measurement, lowering energy consumption and minimizing environmental impact.

APPAREL COSTING

FAD 2.3

No. of Teaching Hours:

Objectives:

- To familiarize students with apparel costing methods and techniques.

Unit 1

8 hrs

Cost accounting: Classification of cost elements- direct and indirect. Determination of factory cost, administration cost and sales cost of an apparel product. Manufacturing cost account statement - preparation and analysis, cost behavior patterns – fixed, variable, semi variable. Calculations related to job order costing and process costing.

Unit 2

6 hrs

Accounting for factory overhead: Capacity level concepts, production and service departments, indirect costs, over and under applied overhead.

Unit 3

8 hrs

Cost volume profit analysis: Break-even analysis, Contribution margin, variable, cost ratio, marginal income. Sales mix by garment style, effect of volume change, price/volume analysis.

Unit 4

8 hrs

Standard Costing: Variance analysis, setting cost standards, price variance analysis for material, labour and overheads. Determination of standard cost for weaving, knitting and processing cost of woven/knitted fabrics. Fabric cost – stripe/ checked, printed and embroidery and special finished goods.

Unit 5

6 hrs

Determining pricing of apparels: Price elasticity of demand and supply, Sample costing-marginal revenue and marginal cost. Assortment order planning -cost determination, size and colourwise – men's, women's and children's wears.

Unit 6

8 hrs

Pricing methods: Cost plus pricing methods / full cost pricing, conversion cost pricing, differential cost pricing; variable cost pricing, direct cost pricing. Derivation of cost of apparel products – woven / knits. CM, CMT cost analysis for various styles. Activity based costing, Cost analysis for various styles of garments. FOB/CIF/C&F pricing of apparels.

Unit 7

8 hrs

Budgeting process: Budgeting principles for the apparel industry, fixed vs. flexible budget, master budget, limitations of budgets. Project proposal for setting up a new garment unit.

FASHION MERCHANDISING AND MARKETING

FAD 2.4

No. of Teaching Hours: 52

Objectives

- To acquaint students with fashion merchandising and marketing concepts.
- To endow students with a broad perspective on emerging trends in merchandising & challenges in marketing.

Unit 1

3Hrs

Introduction to merchandising: Evolution, merchandising types, basic functions of merchandising, merchandising technology, merchandiser's key responsibilities.

Unit 2

3 Hrs

Domestic and export marketing: Study of market, market structure, market types, business strategic planning, micro and macro environments, market development, problems and benefits.

Unit 3

4Hrs

6 R's of fashion merchandising, fashion forecasting, fashion interpretation, merchandise resource planning, elements of planning, capacity planning, merchandising calendar, KPI measurements, buying and selling seasons in different market.

Unit 4

6 Hrs

Market Research: Research types, research objectives, developing research plan, methods of sampling, data source & collection methods, data analysis, presenting findings, interpretation and implementation.

Unit 5

2 Hrs

Consumer behaviour, target market and market segmentation.

Unit 6

4 Hrs

New product line development: Types of products, study apparel product lines, product life cycle, brand management, idea generation, screening, concept testing, test marketing, commercialization, product positioning, major reasons for product failure.

Unit 7

4 Hrs

Preproduction activity: Pre-production & TNA meetings, sampling-developing samples, sample types, sample approvals, lab dip, yarn dip, bit loom, strike offs, pre-costing and order follow-up.

Unit 8

8Hrs

Purchase Management: Role and responsibilities of purchase department, purchase cycle, global sourcing methods, identification of vendors, vendor analysis, evaluation of vendor, ratings criteria and selection procedure, negotiation and bargaining, vendor relations
Order confirmation, consumption, final costing, pricing, purchasing of raw materials, bill of materials, trim card, production file, and production follow-up.

Unit 9**10Hrs**

Marketing mix, assortment and range planning, promotional techniques, distribution channels, market intermediaries & logistics management.

Retail formats: Organized, unorganized formats, types of retail stores – convenience stores, super markets, departmental stores, hyper markets, lifestyle stores, franchisee outlets & specialty stores.

Unit 10**8Hrs**

Emerging trends and issues in marketing: Consumerism, rural marketing, social marketing, online marketing, and green marketing.

Quality assurance and IT application in merchandising, Textile and apparel policies- FDI policies in retail sector.

CHEMICAL PROCESSING & FINISHING

FAD 2.5

16 Practicals of 4 Hrs each

Objectives:

- To familiarize students with chemical processing techniques.
- To impart the skills of preparation and dyeing of textiles.

Unit 1

4

Pre-processing of textiles: Desizing, degumming, scouring, bleaching, bio polishing, optical whitening, mercerization.

Unit 2

1

Water quality analysis: hardness, pH, salinity, TDS.

Unit 3

7

Dyeing: Dyeing textiles with direct, acid, basic, reactive, disperse, sulphur, vat dyes & natural dyes. Assessment of colour fastness of dyed samples.

Unit 4

1

Colour measurement: Determination of K/S values and colour difference of dyed fabrics

Unit 5

1

Printing: Printing of cotton by direct technique

Unit 6

2

Effluent analysis: COD, BOD, pH, TS, TDS.

GARMENT CONSTRUCTIONII

FAD 2.6

16 Practicals of 4 Hrs each

Objectives:

- To familiarize students with spec sheet analysis, garment construction and its evaluation.
- To acquaint students with garment quality tests and assessment methods.

Unit 1

3

Development of basic block for men using flat pattern and draping technique.

Unit 2

2

Development of collar, sleeve, pocket, cuff & placket design and its variations

Unit 3

6

Design and construction of men's clothing (upper garment & leg wear) and develop a spec for the same.

Unit 4

1

Analyse the constructed garments using standard methods.

Unit 5

2

Garment quality test for dimensions, stitches, seam appearance, seam strength, seam slippage.

Unit 6

2

Garment accessory tests: Buttons impact and compression tests, zippers test, hooks and loop fastener tests

PROJECT WORK
8 Hrs/week

FAD 2.7

Students have to undertake project in the relevant areas of apparel manufacturing. At the end of the first semester, students have to submit the project proposal for approval. The project work shall be carried out during the II Semester either in the Department or at an approved industry / organisation under the supervision of the guide. Three copies of the project reports are to be submitted to the Department through the guide before the commencement of II Semester examination.

TEXTILES FOR INTERIORS

FAD 2.8 A

No. of Teaching Hrs. 39

Objectives:

- To enable students to understand various textiles used in interiors.
- To impart knowledge on various application of textiles in interiors.

Unit 1

4 hrs

Fundamental principles of interior textiles: classification of interior textiles. Types -Natural and synthetic fibres for interior textiles; the use of knitted, woven and nonwoven fabrics in interior textiles. Their characteristics and application in interiors.

Unit 2

4 hrs

Interior textiles from antiquity to modern -Surface design of fabrics for interior textiles. Use of textiles in carpets and floor coverings. Special finishes for carpets and floor coverings, its care and maintenance.

Unit 3

4 hrs

Developments in interior textiles: Upholstery fabrics for interiors. Methods and innovative textiles for seating. Advances in joining fabrics for the furniture industry.

Unit 4

4 Hrs

Development and characteristics of interior textiles for automotive, locomotives and aeroplanes.

Unit 5

4 Hrs

Development and characteristics of interior textiles for hospitals and hospitality industry.

Unit 6

6 hrs

Developments in special finishing treatments for interior textiles: Soil and stain resistant finishes, Fragrance textiles, odour resistant, antimicrobial finishes, flame retardant, Fire testing of upholstered furniture. Testing standards and evaluation of risk analysis.

Unit 7

5 hrs

Fabrics for soft furnishing: Textiles for carpets, durries, tapestries, drapery, upholstery, wall coverings. Home furnishing - their properties, uses and application in the interiors, other materials used for interior textiles- Cork, leather, paper, Rexene etc.- their properties, uses and applications in the interiors.

Unit 8

4 hrs

Environmental issues in interior textiles: A brief overview of green materials used for textiles for interiors. Role of textiles in indoor environmental pollution- problems and solutions.

Unit 9

4 Hrs

Current trends and forecast on interior textiles.

ECO TEXTILES AND SUSTAINABLE CLOTHING

FAD 2.8 B

No. of Teaching Hrs. 39

Objectives: To acquaint students with eco-friendly processes and products.

Unit 1

8hrs

Introduction: Differences between chemical & green processes, rules/recommendations for using chemicals, raw materials & waste handling for sustainable textiles & clothing.

Unit 2

10hrs

Eco-friendly chemical processing: Modern approaches to eco-friendly wet processing of woven and knitted clothing. Red listed textile chemicals, their sources and remedies. Eco-friendly dyes and their method of dyeing. Energy efficient production methods and processing techniques. Eco-labeling and various eco-standards, enzymes and natural dyes.

Unit 3

6hrs

Quality standards and assessment of Eco-textiles: Oeko-tex standards, GOTS standards: certification procedures and implementation, ISO 14000 & EMS: guidelines and implementation. Toxicology of textile dyes and chemicals, eco- parameters and testing of various toxic chemicals and dyes.

Unit 4

6 hrs

Organic and Sustainable textiles: Organic fibre production & processes- cotton, wool silk, bamboo, Regenerated fibres- Lyocell, PLA, Recycled fibres- PET. Reduction of carbon footprints in textile processing.

Unit 5

4 Hrs

Introduction and importance of recycling and up cycling for growing source of innovative design in the fashion and accessories, processing, production and their applications.

Unit 6

5hrs

Manufacturing rights-Ethical and environmental issues relating to textiles and fashion industry. Ethical, standard practices for sourcing of sustainable fashion clothing and accessory. Corporate social responsibility in fashion and apparel industry.

References:

1. Blackburn R S, 'Sustainable textiles: Life cycle and environmental impact', Woodhead Publishing Ltd, UK, 2009.

4. Skelly J. K., "Water Recycling in Textile wet Processing", Woodhead Publishing Ltd, UK, 2003.

5. Trivedi R.K., “Handbook of Environmental laws, Acts, Guidelines, Compliances and Standards”, Vol. 1, Enviro Media, India, 1996.

SEMESTER III

APPAREL QUALITY CONTROL AND STANDARDS

FAD 3.1

No. of Teaching Hrs. 52

Objectives:

- To impart skills for analysis of garment specification sheets and to translate them into quality output.
- To familiarize students with advanced apparel quality tests and standards

Unit 1

8Hrs

Introduction to quality control and standards: Evolution of quality, quality planning, quality control, quality assurance, total quality management-contributions of Deming, Juran and Crosby, Quality Management System- Organizing, planning and implementation.

Quality standards: importance, benefits, levels and sources of standards- ISO, AATCC, ASTM, BS, BIS, DIN.

Unit 2

6 Hrs

Quality Specifications: Yarns, fabrics & trims defect analysis and rectification.

Garment Standards and Specifications: Analysis of pre-sample specification of garment or apparel product, understanding quality assurance in terms of measurement, sewing operations and finishes as per the specification sheet and garments defect analysis.

Unit 3

8Hrs

Eco management of textile and apparel industry: Global scenario, eco textiles, eco standards and certifications - ISO 14000, Eco-mark, Oeko Tex 100 standards, GOTS, OHSAS, Green label, Green Seal.

Eco specifications and restrictions in apparels and textiles: Sensitizing dye stuffs, allergic dyes, carcinogenic anions, red listed as per eco specifications, chemicals used in dry cleaning which deplete ozone, pH value, formaldehyde contents, heavy metal contents, pesticides and herbicides, azoic dyestuffs nickel pentachlorophenol, colourfastness, brighteners, softening agents, etc.

Unit 4

8Hrs

Fabric hand characteristics- Drape, bending, crease recovery, shear, bias extension, formability, friction- objective measurement by FAST & KES.

Serviceability: Snagging, pilling, abrasion resistance, tearing strength, tensile, bursting, seam strength, seam slippage, flammability, soil resistance, soil release.

Unit 5

8Hrs

Aesthetics-Colour measurement, shade variation and colour fastness to washing, light, perspiration, crocking and other agencies.

Hygralexansion, relaxation shrinkage- methods of measuring dimensional change to dry cleaning, dry heat and steam.

Transmission characteristics – air permeability, heat transmission, light permeability, moisture transmission and water permeability.

Unit 6**6Hrs**

Garment Quality tests for dimensions, fabric construction, weight, properties, stitch lines, seams, special stitches, finishes etc.

Durability characteristics of trims - resistance of zippers, buttons, snaps, buckles etc. to abrasion, bursting and corrosiveness.

Unit 7**4Hrs**

Labelling: Introduction, labelling parameters, fibre content, care labelling and flammability, wash care labels, labelling systems - Canadian, American, European, Australian, Sweden, UK, Germany and Japan, Regulations for labeling parameters, Eco-labelling.

Unit 8**4 Hrs**

Garment defects: Cutting defects, sewing defects, assembly defects, pressing, finishing and packaging defects, and procedures of quality evaluation, revision and approvals as specified in the specification sheet.

FASHION ACCESSORY DESIGN

FAD 3.2

No. of Teaching Hrs. 52

Objectives:

- To make students understand current accessory categories trends, designs, materials selection, production process, costing and marketing aspects

Unit 1

10Hrs

Introduction to Fashion Accessories: Categories for men, women and children, functions and features, inspirations, analyse forecasting reports different sources, accessory trend reports, designing aspects, selection of colours, materials, with relation to clothing line.

Unit 2

8Hrs

History of jewellery from various cultures, gemology and categories of traditional and contemporary jewellery, production and processing procedure, beading techniques with application on earrings, bracelets, and neckpiece, current trends in jewellery.

Unit 3

8 Hrs

Designing with leather and fur: Evolution categories, sources, production and processing procedure, design and current trends in leather and fur, laws and regulation for production, marketing and labelling of leather and fur products.

Fashion leather goods: Belts, shoes and socks and shoe accessories, bags, clutches and travel accessories.

Unit 4

6Hrs

History of headgears from various cultures, categories, styles, materials used and current trends. Hair accessories and hair adornments.

Unit 5

4 Hrs

Scarves and wraps: Current trends, materials used and style features.

Unit 6

6Hrs

Lifestyle and tech accessories: Sunglasses and readers, materials used and manufacturing process, current trends in sunglasses and readers.

Unit 7

6 Hrs

Trends in imitation jewellery: Design, inspirations, production process, compatibility of design concepts between materials used and style characteristics with clothing line.

Unit 8

4 Hrs

Major fashion accessory houses, inspirations, product releases, marketing overview.

References:

1. Judith C. Everett , “Guide to Producing a Fashion Show” Fairchild Books, 3rd Revised Edition, 2013.
2. Olivier Gerval, “Fashion Accessories” (Studies in fashion), Firefly Books, 2010.

5. John Peacock, "Fashion Accessories: The Complete 20th Century Sourcebook", Thames and Hudson, 2000.

RETAIL MANAGEMENT

FAD 3.3

No. of Teaching Hrs. 52

Objectives:

- To make the students understand retailing as an industry.
- To acquaint the students with knowledge & skills for store operations, retailing marketing & merchandising management functions.

Unit 1

4 Hrs

Overview of Retailing Environment, Store Formats – Types of Retailers and types of Ownerships, Elements of Retail Mix, Store Organizations, Retail Market Strategy

Unit 2

3 Hrs

Trade area analysis and site selection, Location advantage and disadvantage

Unit 3

6 Hrs

Departmentalization, Layout planning and space allocation, Basic Profit Factors – The Relationship of Markup to Profit, Retail pricing & re-pricing

Unit 4

8 Hrs

Retail Market structure, retail functions & distribution, channels of distribution, sorting process, relationship between retailers & their suppliers, wholesaling, exclusive distribution, intensive distribution, selective distribution, marketing concepts in retailing, structure of global retail markets & consumers, profile of Indian retail markets

Unit 5

6 Hrs

Retail Store Business Plan, profit planning, net profit margins, returns on assets, budgeting decisions, magnitude of various costs, productivity targets, operating expenses

Unit 6

6 Hrs

Store operations; Store formats, size & space allocation, operating functions to be performed, personnel utilization, store maintenance, energy management & renovations, inventory management, credit management, computerization, crisis management, insurance

Unit 7

4 Hrs

Inventory Methods, Six months buying plans – stock turn, open to buy

Unit 8

8 Hrs

Sales promotion techniques, advertising, public relations, personnel selling, publicity, role of salespersons, word of mouth, incremental promotion method, distributed promotion method, setting retail promotion goals.

Unit 9

3 Hrs

Customer Service; Loyalty Programmes and Customer Relationship Management

Unit 10**4 Hrs**

Strategic Profit Model, Retail Mathematics, Retail balance sheets, calculations involving net profit margins, asset turnover, returns on assets, financial leverage, quick ratios, current ratios, collection periods, profits & networths, cash inflow & cash outflow, productivity, sales to stock ratio.

1. References:

1. Barton A Weitz, "Retail Management" McGraw-Hill Higher Education, 9th Edition, 2013.

7. James C. Makens, Robert G. Roe, "Retail management: Satisfaction of consumer needs", Chicago: Dryden, 3rd Edition, 1983.

FASHION DRAPING

FAD 3.4

16 Practicals of 4 Hrs each

Objectives:

- To impart in depth knowledge of draping techniques.
- To understand and analyze draping behaviour of different textile materials.

Unit 1

1

Introduction to draping: Draping terminology, tools and equipments, dress forms, elements of fabric behaviour, principles and techniques of draping.

Unit 2

4

Draping of foundation patterns-Basic bodice, basic skirt / trousers, basic sleeve- Children and adults

Unit 3

5

Designing draped garments based on theme using following components with different fabrics

- a. Bodice variations- dartless silhouettes, princess shape.
- b. Midriffs & Yokes
- c. Collars
- d. Cuffs
- e. Sleeves
- f. Pocket

For upper garment, skirts / pants.

Unit 4

2

Design, develop and construct an evening gown using draping technique

Unit 5

4

Transformational Reconstruction (TR) technique for design and volume. (TR cutting)

ADVANCED TEXTILE AND APPAREL TESTING

FAD 3.5

16 Practicals of 4 Hrs each

Objectives:

- To acquaint students with procedures adopted to analyze textile fabrics and apparel for end use performance.

Unit 1

4

Determination of fabric tensile characteristics, tearing strength and bursting strength. Seam strength and seam slippage.

Unit 2

6

Testing fabrics for stiffness, drape co-efficient, abrasion resistance, pilling resistance, dimensional stability and colour fastness.

Unit 3

3

Testing fabrics for moisture properties: moisture management, repellence properties.

Unit 4

1

Flammability tests for textile fabrics.

Unit 5

1

Assessments of tailorability of fabrics using FAST.

Unit 6

1

Objective colour measurement of dyed fabrics.

APPAREL VALUE ADDITION

FAD 3.6

16 Practicals of 4 Hrs each

Objectives:

- To introduce and train students on value addition aspects.
- To enable students to learn methods of value addition using different techniques.

Unit 1 Introduction to value addition techniques through weaves, prints, embroidery and painting techniques	2
Unit 2 Develop designs using different types of weave designs, print, painting.	4
Unit 3 Developing samples of regional embroideries of India.	4
Unit 4 Appliqué, Bead work, Patch work, Cut work, drawn thread work and smocking	2
Unit 5 Design and development of samples using metal embroidery	2
Unit 6 Dyeing: Tie and dye, Batik, Shibori and their types.	1
Unit 7 Market Survey for value addition and surface ornamentation samples and pricing, with respect to value addition, ornamentation and develop a folio.	1

FASHION ACCESSORY DESIGN AND PRODUCTION

FAD 3.7

16 Practicals of 4 Hrs each

Objectives:

- To impart knowledge of fashion accessory materials and handling methods.
- To familiarize students about current fashion accessory making trends.

Unit 1

2

Portfolio of accessory materials: Beads, stones, fabrics, threads, fasteners.

Unit 2

3

Sketching and rendering of belts, gloves, hats, bags and construction of any one.

Unit 3

6

Sketching of Indian jewellery: Mughal Jewellery, Thewa, Kundan Jewellery, Temple Jewellery and construction of contemporised design inspired by traditional Indian jewellery.

Unit 4

2

Sketching of accessories on women and men (2 each).

Unit 5

3

Designing and develop a sample using macramé, crochet, bead work technique

FASHION DESIGN

FAD 3.8 OE

No. of Teaching Hrs. 52

Objectives:

- To impart advanced knowledge in fashion design.
- To impart knowledge about designing for special categories.

Unit 1

2 Hrs

Design Concepts: Elements and principles of design, application of design concepts in fabrics and fashion products.

Unit 2

6Hrs

Couture: Meaning and place in the fashion industry, organization, controlling bodies, International couture, decline and revival of couture, characteristics and specialties.

Unit 3

6Hrs

Ready-to-wear: Definition, origin, evolution of utility clothing, design process, manufacturing techniques, work rooms and studios, factors in the growth of the industry, contribution of various cultures to ready-to-wear industry.

Unit 4

6Hrs

Mass Production: Process, production, sizing, design strategies, lines within a designhouse, offshore production and new trends.

Unit 5

6Hrs

Designing of apparels for specialty shows: Introduction, need for specialty shows, different categories- Fashion shows, trade shows, collection shows.

Unit 6

6Hrs

Designing for special categories: Infants, maternity, plus-size, old-age, physically challenged.

Unit 7

8Hrs

Designing of intimate apparels: Evolution of styles from antiquity to modern, fibers, fabrics & accessories used, types of intimate apparels, relationship between intimate apparel designs and ready-to-wear designs.

Unit 8

6Hrs

Designing with leather and fur :Materials, production procedures- processing, finishing and apparel production, styles, laws and regulations, marketing and scope.

Unit 9

6Hrs

Home fashions: Evolution of designs in home fashions, Categories of home furnishing products - upholstery, table, bed and bath linen, styles, licensing and retailing of home fashions.

References:

1. Frances Leto Zangrillo, "Fashion Design for the Plus-size", Fairchild Publication, 1999.
2. Gavin Waddell, "How Fashion works", Blackwell Publishing, 2005.

3. Jay Diamond, Ellen Diamond, "The World of Fashion", Fairchild Publication, 3rd Edition, 2002.
4. Laver, James, "Costumes & Fashions: A concise history", Thames & Hudson, 1982.
5. Rubin LG, "The World of Fashion", Canfield press, 1976.

SEMESTER IV

FUNCTIONAL TEXTILES & CLOTHING

FAD 4.1

No. of Teaching Hours: 52

Objectives:

- To introduce students to functional aspects of textiles.
- To impart knowledge on manufacture and end use applications of functional clothing and textiles.

Unit 1

4 Hrs

Functional Textiles: Market overview, need for functions, properties of textiles for specific functions, global and regional trends in functional textile production, world market trends.

Unit 2

6 Hrs

Functional fibres: Introduction, high performance fibers and specialityfibres – classification and important applications. Functional yarns - Introduction, staple and filament yarns. Functional fabric structures – criteria to select fabric structures for various functional fabrics.

Unit 3

6 Hrs

Surface modification for improved functionality: Introduction, types of surface modification, physical and chemical characterization of surface modifications, applications for functional textiles, future trends.

Unit 4

6 Hrs

Medical textiles: Introduction, biomaterials for medical textiles, implantable, non implantable, extra corporal, healthcare and hygiene applications of textiles.

Unit 5

4 Hrs

Protective textiles: Introduction, thermal, chemical and ballistic protection and their application.

Unit 6

6 Hrs

Defense textiles and textile reinforced composites: Military textile materials, water proof breathable, water vapour permeable fabrics, military combat clothing systems, camouflage clothing, composite materials, and applications of textile composites.

Unit 7

4 Hrs

Build textiles: Introduction to construction textiles, advanced thermal insulation, two dimensional & three dimensional fibre textile composites, selection and property analysis of fibers and structures.

Unit 8

6 Hrs

Nano textiles: Nano science and technology.
Carbon nanotubes and nano applications in textiles and their importance in textile industry.

Unit 9**6 Hrs**

Smart textiles: Interaction design in smart clothing, specific requirements and applications of sensors, actuators, data processing, storage and communication in intelligent textile assembly, phase change materials, stimuli sensitive materials applications in textiles, wearable electronics and applications.

Unit 10**4 Hrs**

Eco-functional textiles: Introduction to eco-friendly textile materials-green composites.

References:

1. Amar K. Mohanty, Manjusri, Lawrence T, "Natural Fibers, Biopolymers and biocomposites" Boca Raton, London, 2005.

4. HVJ, "Shape Memory Polymers and textiles", Wood Head Publishing limited, England, 2007.
5. Xiaoming Tao, "Wearable Electronics and Photonics", The Textile Institute, CRC press, Manchester, 2005.

FASHION JOURNALISM AND PHOTOGRAPHY

FAD 4.2

No. of Teaching Hrs. 52

Objectives:

- To develop creative fashion photographic approaches among students for thematic fashion article presentation and interpretations.
- To educate fashion journalism methods and currents trends of photography methods and equipments.

Unit 1

6 Hrs

Fashion Journalism: History, introduction, elements of fashion journalism, scope of fashion journalism in current fashion world, fashion writers, writing and editing articles, published fashion media, formulation and styling of fashion shoot, fashion critics and fashion reports.

Unit 2

8 Hrs

Fashion journalists: Types, researching of fashion trends and conducting interviews, working methods, information gathering methods, tools and techniques used to gather information, reporting styles.

Unit 3

4 Hrs

Introduction to fashion journalism media: Fashion magazines, books, lifestyle sections of newspapers, television, online fashion magazines, websites, blogs, and social networks.

Unit 4

6 Hrs

Public relationship management: Cordial relationships with fashion industry people-fashion photographers, designers, celebs, models and public relation specialists.

Unit 5

8 Hrs

Fashion photography: Types of photography, criteria for selecting camera and lens, working principles of professional cameras and accessories.
Photography techniques and equipment for different fields: Modelling, newspaper, magazines, Occasions: Fashion Shows, fashion fairs.

Unit 6

6 Hrs

Lighting techniques: Need, methods, lighting ratio and the effects of soft high key, glamour shots, mood shots, styling and makeup for fashion and glamour photography.

Unit 7

8 Hrs

Indoor and Outdoor Photography: Camera, lens and equipment selection, lighting techniques - shooting with natural light, methods used to modify lighting on location, half and full length shots, comparison of Outdoor Photography by with Indoor photography.

Unit 8

6 Hrs

Fashion photography trends: Photography using digital cameras video photography, image mixing, application of computers in photography- image collage methods, cloning techniques, printing techniques.

MANAGEMENT INFORMATION SYSTEMS

FAD 4.3

No. of Teaching Hrs. 52

Objectives:

- To equip students with essential knowledge of computers and Management Information system.
- To acquaint students with emerging trends in MIS.

Unit 1

8 hrs

Management Information Systems - Need, Purpose and Objectives. Contemporary Approaches to MIS - Information as a strategic resource - Use of information for competitive advantage - MIS as an instrument for the organizational change

Unit 2

8 hrs

Information, Management and Decision Making, Models of Decision Making - Classical, Administrative and Herbert Simon's Models, Attributes of information and its relevance to Decision Making - Types of information

Unit 3

6 hrs

Information Technology - Definition, IT Capabilities and their organizational impact. Telecommunication and Networks - Types and Topologies of Networks, IT enabled services such as Call Centers, Geographical Information Systems etc.

Unit 4

6 hrs

Data Base Management Systems - Data Warehousing and Data Mining

Unit 5

4hrs

Systems Analysis and Design - Systems Development Life Cycle, Alternative System Building Approaches .

Unit 6.

8 hrs

Decision Support Systems - Group Decision Support Systems, Executive Information Systems - Executive Support Systems - Expert Systems and Knowledge Based Expert Systems, Artificial Intelligence

Unit 7

8 hrs

Management Issues in MIS - Information Security and Control, Quality Assurance, Ethical and Social Dimensions, Intellectual Property Rights as related to IT Services / IT Products - Managing Global Information Systems

Unit 8.

4hrs

Applications of MIS in apparel industry, Role of information systems in SCM and CRM.
